- ✓ **Screening programs and clinical studies**

From experts for experts

synedra View Professional is a fast and intuitive viewer specifically designed to fit the needs of radiologists.

In addition to that, GPs and also larger health facilities appreciate the multiple ways in which synedra View Professional can be used.

As the producer of synedra AIM, the tried and tested universal archive for medical data, synedra has put all the experience it has gathered over the years into the development of synedra View Professional.
